

# MEDCO'S PLANS FOR YOUR FUTURE SERVICE

Chapter 23 in the  
Serial Story of  
MEDFORD  
CORPORATION

Hello, Lumber Friends! At the M-E-D-C-O "mike" today is B. L. Nutting, Medford Corporation's manager—to tell you how our company is planning ahead—many years—for your future service.

As has been told in previous broadcasts, Medford Corporation, since 1935, has been operating on a sustained-yield basis — designed to perpetuate MEDCO service indefinitely.

Today, we are pleased to announce that Medford Corporation has recently acquired 22,000 acres of additional timberlands, making a total of 78,000 acres of forest producing lands in our block ownership. This managed forest will project our company's active operation into the future as far as we can see.

With this enlarged timber reserve, MEDCO expects to continue its well-rounded program of fire protection, snag-falling and insect control—to husband natural forest regrowth and provide a true sustained-yield operation where annual increment is sufficient to balance drain.

Needless to say, a company like Medford Corporation, which expects to be in business indefinitely, has the long-run interests of its customers in mind at all times, in its dealings and plans.

Until our next broadcast, this is B. L. Nutting, signing off from station M-E-D-C-O.
